## Number of Calls made by Nurse:

Welfare calls,	1,161
Medical calls,	1,692
	<hr/>
Total,	2,853

Attention is again called to the ever increasing number of calls made by our nurse. This would seem to indicate the usefulness of the service to the community, and that many people are availing themselves of this opportunity for trained, skilled nursing in the home, when there is no real need of a full term private nurse.

The monthly baby and pre-school clinics have been well attended, and proved very helpful to a large number of mothers and much "follow-up" work has been done.

On December 19 our regular nurse, Miss LeShane, was married to Mr. Harry S. Patten, and started on a three months' leave of absence. She expects to be with us again about April 1. During Mrs. Patten's absence her place is being very adaptably filled by Mrs. Marjorie McHugh, who has substituted for us before. Under her tactful and sympathetic care, many unfortunate sufferers from present economic conditions have been helped and comforted.

The Nursing Committee is very grateful for the sympathetic cooperation of all our people, especially the Selectmen, and hopes that the Nursing Service may continue to justify itself.

Respectfully submitted,

LOTTIE L. RUST,

Treasurer.

**REPORT OF HEALTH OFFICER**

To the Honorable Board of Selectmen:

The undersigned was appointed Health Officer in June, 1931, following the death of Lester E. Thompson.

During the year there were 56 births and 53 deaths in this town. Deducting the births at the Huggins Hospital, of non-residents, there is a considerable preponderance of deaths over births.

As the year ended we were in the midst of an epidemic of measles of rather mild type. 103 cases have been reported but no fatalities and no serious complications have occurred. Three cases of scarlet fever of a mild type have been reported.

For the first time trichiniasis has been reported. All three of the cases were infected outside the town, two in Maine and one in Connecticut. This disease never occurs except through the ingestion of improperly cooked pork products from infected pigs. All three patients with the disease recovered, and in a comparatively short time.

No case of poliomyelitis (infantile paralysis) occurred.

Many complaints were received by the department, regarding the odor and flavor of Beech Pond water. This disagreeable but not dangerous change has happened many times in the past and is bound to happen in the future, since it is due to the normal growth of algae in the pond. Nearly every community which uses lake water must have this development about once a year. Each time many remedies and explanations are offered but none suffice to prevent or to cure the condition. Examination of the water by the state labora-

tory officials shows, as always, a remarkably pure and clean water supply.

The State Board of Health is determined to enforce the law regarding the pollution of Lake Winnepesaukee. Steps must be taken, either by the Town or the Precinct, to stop the flow of sewage into the Lake, Smith's River and Crescent Lake. A survey and plan has been prepared by Weston & Sampson, Sanitary Engineers, 14 Beacon Street, Boston, who recommend a system of pipes, pumps and septic tanks to take care of all the sewage from the village and to treat the effluent from these tanks so that it will be harmless.

FRED E. CLOW, M. D.,

Health Officer.

February 1, 1932.
